

How we have supported financiers and investors in the PV and wind market over the last 6 months

230 MW: PV Asset Management

WiseEnergy Italy was mandated to provide full asset management services by a prominent solar fund with a current portfolio of **120 MW** and a pipeline of further **30 MW**.

We implemented an optimisation plan for a **26 MW** portfolio owned by a leading private equity fund generating over **€150k** pa of additional cash distributable

WiseEnergy UK continued to increase its PV portfolio under management by securing mandates on further **56 MW** reaching over **550 MWp**

68 MW: PV and Wind Technical and Financial Advisory

Non performing loans we supported **3** major leasing companies in the technical and financial evaluation of non performing solar assets totaling **15 MWp**. The assessment involved both ground mounted and mono-axis tracker PV plants.

Technical advisory for refinancing of energy portfolios

- Technical advisory for the refinancing of a **16 MWp** solar portfolio for the benefit of a leading international bank
- Technical assessment of a **30 MW** wind park to support the renegotiation between a relevant leasing company and an Independent Power Producer

Technical advisory for acquisition WiseTech performed a technical advisor with thermographic analysis with drones and on site tests for to evaluate the acquisition of **2 MWp** plant for a foreign family office

Sell-side advisory WiseEnergy successfully supported one of its Clients as technical and financial advisor of its **5 MW** portfolio in Italy

36 MW: Risk Mitigation

Verifications ahead of GSE inspections: WiseEnergy was appointed by both a foreign IPP and a swiss private equity fund for the complete assessment of their respective **10 MW** and **26 MW** portfolio to proper evaluate the potential risks in case of GSE inspection according to decree "Decreto controllli".
