

## 281 MW: PV Asset Management

WiseEnergy Italy secured new asset management mandates :

- full asset management services for a leading German investor in relation to a current portfolio of **55 MW**
- Technical asset management on a **40 MW** portfolio owned by a family office
- Administrativa asset management on a **15 MW** portfolio

WiseEnergy entered the **Indian market** by securing a mandate to provide asset management service to a **105MW** portfolio and the **African market** by securing an asset management contract on a **6 MW** plant in Namibia

WiseEnergy UK continued to increase its PV portfolio under management by securing mandates on further **60 MW**.

## 90 MW: PV and Wind Technical and Financial Advisory

**Optimisation and revamping plan** WiseEnergy identifies and is currently implementing some interventions to increase the productivity of a **20 MW** portfolio (through inverter replacement and protection from humidity on key equipments) with a pay back time ranging from 2 to 4 years

**Technical advisory for acquisition** We conducted a pre-acquisition technical due diligence on a **15 MW** solar portfolio for the benefit of a leading institutional investor

**Accounting audit** Our finance team conducted pre-acquisition accounting audit on 20 SPVs related to **55 MW** of plants identifying over €600k of adjustments in the acquisition price

## 50 MW: Risk Mitigation

**Verifications ahead of GSE inspections.** WiseEnergy was appointed by both an Italian investor and a swiss IPP to properly evaluate the potential risks in case of GSE inspection according to decree "Decreto controlli" in relation to their respective portfolios of **15 MW** and **35 MW**.
