

Is your plant losing profitability? Does it suffer from technical problems you can't solve?

WiseEnergy is innovation. It is in our DNA. It is not only about our approach: it is a mindset that leads all our activity.

It is so important to us that we are the only company in the market that has created a dedicated team unit called "**Alpha Team**", a top-level engineering center that works to provide our clients' with the best service and new technical solutions. The Alpha team is a combination of continuous learning, data-driven analysis, case studies and multidisciplinary-skills.

Plants are getting old: it is very important to keep high level performance.

Following **our philosophy**, our aim is to improve the profitability of our clients' assets by identifying and implementing quicker and more efficient interventions in order to mitigate investment risks and improve returns.

Why WiseEnergy?

- We are a dedicated team capable of processing and managing large volumes of data
- We manage the end to end process
- Our team has over 10 years' experience across the lifecycle of PV plants
- We provide asset management to over 1 GW of solar plants: we have already solved the problem you may have!

How?

- Using our Alpha skills and the technology investments we have made in the past 10 years.
- Identifying and testing new technologies, developing new devices according to market needs.
- Carrying out desktop and on-site analysis for assessing plants health and finding innovative solutions.
