

## **WiseEnergy Group secures a new asset management mandate for a 25 MW solar portfolio and increases its track records in technical advisory**

May 19, 2017

**Milan** – During the first quarter of 2017, WiseEnergy Group, the Asset Manager and Technical Advisor for Lenders and Investors in renewable energy plants, further expanded its track records concerning the activities of technical advisory and significantly increased its asset management capability through the acquisition of a new mandate.

More particularly, the noteworthy achievements comprise:

- **January 2017**  
WiseEnergy has been supporting, as technical and administrative consultant, an International Investor in connection with the process to raise debt financing for a PV plant located in Southern Italy;
- **February 2017**  
WiseTech, the technical division of WiseEnergy, supported various family offices and international institutional investors in conducting technical and administrative verifications, ahead of GSE inspections;
- **March 2017**  
WiseEnergy Italia secures a full asset management mandate for a 25 MW solar portfolio located across Italy and owned by a leading private equity and real estate investor.
