

WiseEnergy Group announces Framework Agreement with leading renewable energy investor

May 25, 2017

Milan – WiseEnergy Group, the leading Asset Manager and Technical Advisor for Lenders and Investors in renewable energy assets, is pleased to announce the signature of a framework agreement with one of the largest Investment Funds in the photovoltaic market.

WiseEnergy will provide full asset management services for a portfolio, currently consisting of 17 MWp of plants and which will increase significantly over the next 12 months, as the Fund has committed to investing €150m of equity in the Italian secondary PV market.

“This noteworthy achievement strengthens the Group’s presence in the European renewable energy asset management market”, stated Maria Sabella, General Manager of WiseEnergy Italia. “With a decade of practical experience in the management of over 1.300 renewable plants, WiseEnergy is a full service provider capable of supporting its Clients with a 360-degree vision.

Not only does this new important mandate significantly increase WiseEnergy Group’s asset management capability, but it also confirms our leading position in the European renewable energy asset management market, which is driven by our operational excellence and our ability to enhance returns and mitigate risks across the lifecycle of renewable energy investments owned by players at the top of the field.”
